Experience

Computer Vision / Motion Processing Intern

Nov 2025 – Jan 2026

Semantic Labs (Remote)

- Improved SMPL/SMPL-H motion reconstruction by resolving orientation flips, scaling mismatches, and joint inconsistencies, increasing reconstruction reliability.
- Engineered preprocessing pipelines for large-scale AMASS datasets, enabling robust handling of complex skeletal structures and motion data.
- Developed motion-cleaning algorithms that reduced noise and improved temporal consistency across reconstructed motion sequences.
- Built visualization and debugging tools that accelerated validation workflows and supported rapid experimentation with motion reconstruction algorithms.

Projects

OncoLink – AI Clinical Intelligence Platform

Live Demo

Python, Streamlit, NVIDIA NIM

- Built an end-to-end AI platform that extracts structured oncology data from PDF, DOCX and TXT documents using NVIDIA Nemotron-3 Ultra.
- Implemented Pydantic-based schema validation, clinical data normalization and cross-document conflict detection.
- Developed a Retrieval-Augmented Generation (RAG) pipeline using Sentence Transformers and ChromaDB for semantic search and patient document Q&A.
- Generated unified patient summaries with PDF, TXT and JSON export and deployed the application on Streamlit Cloud.

Datacleanr – ML Data Cleaning Framework

GitHub

Python, Pandas

- Designed a scalable preprocessing framework to automate missing value treatment, outlier handling, skewness correction and feature redundancy removal.
- Implemented safeguards against data leakage and excessive data loss during preprocessing.
- Evaluated the framework on 50+ datasets to ensure robustness across diverse machine learning problems.
- Reduced manual preprocessing effort by automating repetitive data-cleaning workflows.

Technical Skills

Languages: Python

Machine Learning: NumPy, Pandas, Scikit-learn, Model Evaluation

LLMs & AI: NVIDIA NIM, RAG

Computer Vision: SMPL, SMPL-H, Motion Analysis, Pose Estimation

Frameworks & Tools: Streamlit, Git, GitHub, Jupyter Notebook

Education

Techno India NJR Institute of Technology

2023 – 2027

B.Tech in Computer Science

Certifications

- NVIDIA Certification – RAG Agent Development
- Microsoft Applied Skills – Azure OpenAI
